- Ensure technical and business knowledge transfer to your team

## Scope

- Review business requirements and use cases
- Formulate a recommended approach based on Magento Best Practices
- Early identification of usability issues and performance risks

# Magento Architectural Advisory

*Get it right the first time—save time and cost  
with a validated deployment plan*

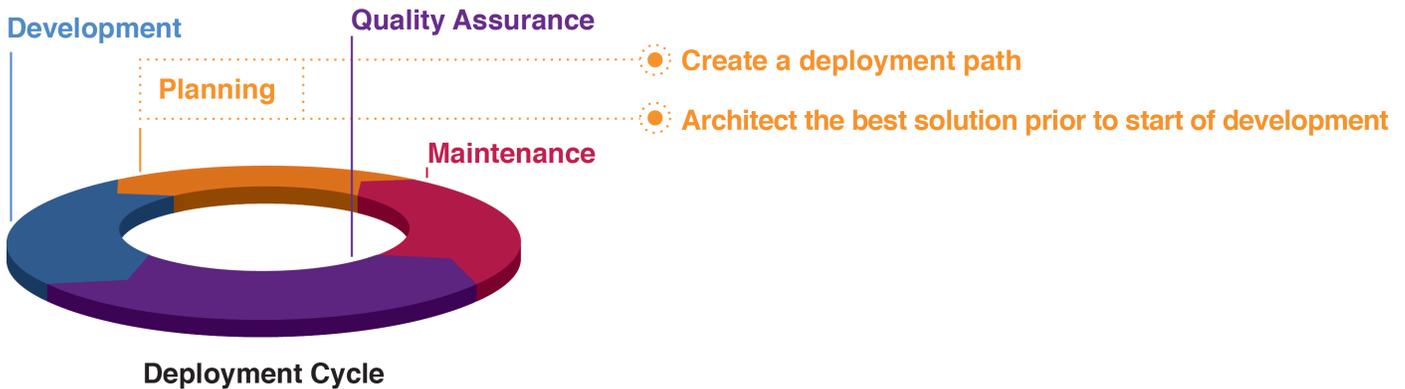

## What It Is

The flexibility of Magento creates multiple decision points, with each decision possibly impacting multiple modules or functionality and performance. Make sure the decisions made for your deployment get you to the right end result. Using the Magento Expert Consulting Group Architectural Advisory service up front will save time, money and headaches in the long run. Engage the ECG during the bid process or as soon as your Magento project gets underway.

## Who It's For

The Architectural Advisory is for organizations looking to extend Magento functionality with the assurance of a validated deployment plan. Use after you have collected business requirements but before you start implementation to ensure you are making the right architectural decisions for long term success.

## When to Use Architectural Advisory

### Why Use the ECG

Whether you are a Magento Solution Partner or merchant, put our expertise and best practices to work for you. Leveraging direct access to Magento’s product and technology development teams and drawing on experience from hundreds of successful Magento implementations, the Expert Consulting Group (ECG) consultants are uniquely equipped to provide you with the guidance needed to validate your design, development and deployment decisions. We can identify architecture and code optimization, provide direction on custom application deployments and identify performance bottlenecks.

### More Information

For more information on Architectural Advisory or any other Magento Expert Consulting Group offering, please contact your Magento sales representative or visit...
