

Magento® Mobile

Put Your Store in the Hands of Customers

Engage your customers and extend your brand like never before with a Magento Mobile native storefront mobile app.

iPhone iPad

Integrated with the Magento eCommerce platform, Magento Mobile enables merchants to take customer relationships to an entirely new level with a branded, cost-effective, easy-to-use, mobile application that includes unique capabilities specifically tailored for a native mobile storefront. Designed to accelerate innovation, Magento also makes the Mobile source code available for those who desire a deeper level of customization.

Our new Magento-powered mobile app has given us an enormous head start in the quickly growing mobile commerce market. Thanks to Magento, developing it was much easier than we ever anticipated and we're very pleased with the result."

Ben Skigen, E-Commerce Director, ToolKing

Integration with Magento eCommerce

- Seamless integration with your current product catalog

- Order history, wish lists and address book

Checkout Integration & Payment Apps

- Integrated with best-of-breed payment applications including PayPal Mobile Checkout
- Optional integration with your existing checkout including Authorize.net, Cybersource and others

Magento Mobile Source Code

The Magento Mobile source code allows you to customize and create your own extensions and to develop a high performing mobile app with a seamless user experience.

- Customize the app with unique features to meet customer requirements
- Easily create new extensions
- Simple application architecture based on Magento core and extension modules
- Objective C source code
- Annual license on a per-customer and per-mobile-application basis

Please contact a [Magento Territory Manager](#) for more information on [Magento Mobile source code](#). Mobile applications created using the source code are submitted to the [Apple App Store](#) and supported by the developer.
